

## State of New York Psoriasis Issue Brief

Psoriasis and psoriatic arthritis are chronic, life-altering and often debilitating conditions that have a serious physical and emotional impact on the individuals and families affected by them. The National Psoriasis Foundation respectfully calls upon Congress to help improve the quality of life of those with psoriasis and psoriatic arthritis by ensuring access to quality care, increasing awareness and understanding of these diseases, and boosting federal research efforts to speed the discovery of a cure.

### **Psoriasis and the state of New York<sup>1</sup>**

According to the National Institutes of Health (NIH), as many as 7.5 million Americans have psoriasis and/or psoriatic arthritis.

The National Psoriasis Foundation estimates that in the state of New York as many as 494,000 adults live with psoriasis and/or psoriatic arthritis.

The average congressional district has as many as 17,000 adults living with psoriasis and/or psoriatic arthritis.

The National Psoriasis Foundation is active in New York. For more information, please contact:
