Gerald Krueger, M.D.

A leader in psoriatic disease research and venerable supporter of the National Psoriasis Foundation for many years, Gerald Krueger, M.D., has been a member of the NPF Medical Advisory Board since 1984 and recently completed a 10-year term as chairman.

Dr. Krueger started the Division of Dermatology at the University Of Utah School Of Medicine in 1972 and has since served as principal investigator in more than 100 clinical trials. He has published more than 200 papers in various medical literature. His current research focuses on identifying unique clinical phenotypes and their associated features as well as identifying genes/gene-sets that associate with or are causative of phenotypes unique to psoriasis. His psoriatic disease research also has a therapeutic aspect, focusing on the early phases of clinical trials using biological response modifiers as well as traditional agents.

In 1989, Dr. Krueger co-chaired the first multi-disciplinary research meeting on psoriasis in the U.S. In 2001, he co-founded the Utah Psoriasis Initiative, with the goal of creating a registry that now contains medical and genetic information from more than 1,400 patients with psoriatic disease. Dr. Krueger has received numerous awards a Lifetime Achievement Award and Founders Award from the National Psoriasis Foundation.
